April 3rd, 2023 / V.1.0

ANGELO MVP

SMART CONTRACT AUDIT  
CERTIFICATE

More information on the audit can be found in the full report presented to Angelo team

### AUDIT SUMMARY

Audit conducted between **March 9th, 2022**, and **April 3rd, 2023**.

The code was delivered in the form of an archive.

Initial SHA256: ■ 97fba58261455f65bffb36a845dbe0076c289440b27b9d56bddda4c8c0bab343

Final SHA256: ■ 431d890f59c06dd98a33876e9fa6f59d860492995b359ed0f29ebce49a955daa

#### SCORE

9.4/10

#### THE GRAPH OF VULNERABILITIES DISTRIBUTION:

- CRITICAL
- HIGH
- MEDIUM
- LOW
- LOWEST

A total of 21 problems were found. 19 issues were fixed or verified by the Angelo team.

	FOUND	FIXED/VERIFIED
Critical	1	1
High	2	0
Medium	2	2
Low	0	0
Lowest	16	16

## SCOPE

The **scope** of the project includes Angelo MVP set of contracts:

contracts\ERC2981\ERC2981.sol

contracts\AngeloERC721.sol

contracts\FractionalNFT.sol

contracts\TokenVault.sol

contracts\WingToken.sol

## SHORT SUMMARY

Blaize Security team performed a security audit for the Angelo MVP protocol. The audit included a manual review by the team of 2 security auditors and a security lead and several testing sessions for business logic against different attack vectors. Auditors assigned a security rating of 9.4 out of 10. The report contains 21 issues and raised questions, all successfully resolved, verified, or acknowledged by the team. Most serious issues were connected to funds transfer and fractions purchase - though they were successfully resolved/acknowledged by the Angelo team. Since the project is in the MVP stage and the team still seeks for the best implementation approach, auditors find the overall security to be at the acceptable level.

Contracts are well-written and gas-optimized, though there are several undocumented approaches. Angelo's team closed or verified all significant security gaps, and the Blaize Security team tested the protocol against the row of possible attack vectors. The Blaize Security team should notice the high level of centralization of the protocol, with the ability to withdraw locked NFT and un-purchased fraction at any moment or change the URI within the token vault. Angelo's team verified this functionality necessary for emergency cases, though auditors left the warning in the report.

Nevertheless, including good native test coverage, the Angelo MVP passed the security audit by Blaize Security.

	<b>RATING</b>
Security	8.8
Gas usage and logic optimization	9.8
Code quality	9.5
Test coverage **	9.7
Total	9.4

**COMPLETE ANALYSIS**

<b>CRITICAL-1</b>		<b>✓ Resolved</b>
	<b>Payment token might get stuck on contract's balance.</b>	
<b>HIGH-1</b>		<b>Acknowledged</b>
	<b>Centralization risk: Curator can withdraw NFT with sold fractions</b>	
<b>HIGH-2</b>		<b>Acknowledged</b>
	<b>Owner is able to withdraw TokenVault tokens.</b>	
<b>MEDIUM-1</b>		<b>✓ Resolved</b>
	<b>ERC20 Tokens transfer is not validated.</b>	
<b>MEDIUM-2</b>		<b>✓ Resolved</b>
	<b>Ether is not refunded.</b>	
<b>LOWEST-1</b>		<b>✓ Resolved</b>
	<b>Lack of events for main admin actions</b>	
<b>LOWEST-2</b>		<b>✓ Resolved</b>
	<b>Custom errors should be used.</b>	
<b>LOWEST-3</b>		<b>✓ Resolved</b>
	<b>Duplicate `require` instead of a modifier.</b>	
<b>LOWEST-4</b>		<b>✓ Resolved</b>
	<b>Typos in parameters names</b>	

<b>LOWEST-5</b>		<b>✓ Verified</b>
<b>Unused fee variable</b>		
<b>LOWEST-6</b>		<b>✓ Resolved</b>
<b>Modifiers can be used for repeated functionality</b>		
<b>LOWEST-7</b>		<b>✓ Verified</b>
<b>The owner is able to change the URI of the token.</b>		
<b>LOWEST-8</b>		<b>✓ Resolved</b>
<b>Storage constant should be used.</b>		
<b>LOWEST-9</b>		<b>✓ Resolved</b>
<b>Royalty can be changed for non-existing token.</b>		
<b>LOWEST-10</b>		<b>✓ Verified</b>
<b>Validation of tokenomic for the token without supply cap.</b>		
<b>LOWEST-11</b>		<b>✓ Resolved</b>
<b>Non-configurable number of airdrop participants.</b>		
<b>LOWEST-12</b>		<b>✓ Resolved</b>
<b>Lack of validation for price and fee paramenters.</b>		
<b>LOWEST-13</b>		<b>✓ Resolved</b>
<b>The payment token and the ether should have the same purchase power</b>		

<b>LOWEST-14</b>		<b>✓ Verified</b>
<b>Duplicate of ERC20 functionality.</b>		
<b>LOWEST-15</b>		<b>✓ Resolved</b>
<b>Inaccurate solc version pragma.</b>		
<b>LOWEST-16</b>		<b>✓ Verified</b>
<b>Only a curator can get fractions.</b>		

### **TEST COVERAGE RESULTS (AFTER AUDITORS TESTING STAGE)**

<b>FILE</b>	<b>% STMTS</b>	<b>% BRANCH</b>	<b>% FUNCS</b>
ERC2981.sol	100	100	100
AngeloERC721.sol	100	100	100
FractionalNFT.sol	92.96	92.31	100
